RESEARCH

- May 2021-
July 2021 **The Long-Term Health Effects of Redlining, UAB Honors College**
Birmingham, Alabama
- Quantitative comparison of mortality rates from chronic disease in 'redlined' and 'nonredlined' cities in the US from 1968-1978
 - Project proposed and completed through UAB Honors College Summer Research Fellowship under mentorship of Dr. Joshua Robinson
 - Data obtained from CDC Wonder database and University of Richmond's *Mapping Inequality* project
 - Data organized and analyzed using STATA
 - Utilized county-level mortality rates from selected chronic diseases and original Home Owners' Loan Corporation maps with assigned colors and ratings, from "Best" to "Hazardous"
 - Project focused on context of redlining, overview of long-term economic and environmental effects, and new comparison of mortality rates
 - Developed categorization of 'redlined' or 'nonredlined' counties based on amount of land area falling into HOLC grade of "hazardous"
 - Oral presentation given July 26, 2021 at UAB Undergraduate Summer Research Expo and awarded 3rd place

EXPERIENCE

- August 2018-
Present **Class Representative, University Honors Program**
Birmingham, AL
- Lead activities committee to plan and organize program-wide events for students and faculty
